WEBINAR

GREEN PRODUCTS GREEN TECHNOLOGY

In Conjunction with Launching of 6th Edition of Green Pages Malaysia

This webinar is to launch malaysiaGBC 6th edition Green Pages Malaysia (GPM). Introduction of GPM and product assessment procedure will be introduced by our GPM Chairman. GPM is a platform for green building owners to source for green and sustainability products. We will have a panel session in this webinar. Our panelists will be discussing about the environmental responsiveness on urban sustainability design. There will be an introduction on the collaboration between malaysiaGBC and Malaysian Institute of Interior Design (MIID) for the future webinars with the objective to create more awareness. Combination of the exterior & interior building design towards green & sustainability approach may create a powerful impact to the future of green sustainable environment.

26th July 2021 | Monday | 9:00 AM - 1:00 PM

SPEAKERS & PANELISTS DETAIL

AR. SERINA HIJJAS

This generation architect, Serina Hijjas is one of the creative directors at HIJJAS architects & planners and is known for changing the building landscape of architecture through buildings that are responsive, energy conscious + bold. Her formative years exposed her to energy efficiency and sustainable design and have culminated in projects like the Heriot Watt University 'green campus', Celcom Tower 'interconnective offices' and EPIC waste training center. Through a series of energy award buildings, the approach to design is holistic, responsive of placemaking + context with a view in generating new environmental sustainable specific strategies in every project.

AR. CHAN SEONG AUN
